

INDUSTRIAL SOURCING AND SUPPLY PARTNER FOR THE POWER INDUSTRY

A new power transformer can take years. Your project cannot.

THRADD sources transformers, generators and switchgear, from a single unit to project quantities, plus the parts and fluids that keep installed transformers in service. We work through established relationships with manufacturers and suppliers.

WHAT WE SOURCE

Transformers

Power, pad-mount and distribution. New, refurbished and surplus. One unit to project quantities.

Generators

Units and complete generator packages. One unit to project quantities.

Switchgear

Assemblies and components. Fuses, fuseholders and in-line disconnects.

Parts and fluids

Transformer parts. Bushings, arresters, valves, gaskets, gauges and relays. Type II mineral oil and natural ester fluid.

Cable and wire

Power cable and building wire. Category 6A structured cabling.

HOW TO BUY

Send a bill of materials, part numbers or drawings. We source it, quote in writing with pricing and lead time, and coordinate delivery across the United States, Canada and the Caribbean.

WHO WE SERVE

Data center builders	Transformer repair shops
Utilities and co-ops	Industrial plants
EPCs and contractors	Bitcoin and AI compute sites
