

SECTOR

Food and beverage

We source and quote the electrical gear a food, beverage or packaging plant runs on, and the sanitary gaskets, seals and valves the product touches, each to your specification from manufacturers and distributors.

Plant power

- Utility service transformers
- Pad-mount transformers
- Dry-type transformers
- Switchgear and breakers
- Motor control centers
- Fuses and disconnects

Send the one-line diagram or the nameplate and we search manufacturers and second sources, then quote what we find.

Backup power for the cold chain

- Diesel and gas generator sets
- Transfer switches
- Generator parts
- Battery strings

Cable and connectors for washdown areas

- Washdown-rated cable and cord
- Stainless and corrosion-resistant connectors
- Compression lugs and terminations
- Cable trays and sleeving
- Grounding hardware

Gaskets, seals and O-rings

- Food-grade gaskets and gasket sheet
- Sanitary clamp gaskets
- O-rings and seal kits
- Pump and mixer seals
- Packing

Name the compound and the standard the part has to meet (FDA, USDA or 3-A) and we source material the maker certifies to it, with the maker's certification carried onto the quote.

Sanitary and process valves

- Sanitary butterfly and ball valves
- Diaphragm valves
- Check and control valves
- Sanitary fittings and clamps
- Sight glasses and gauges

Motors and drives

- Washdown-duty motors
- Variable-frequency drives
- Gear reducers
- Conveyor components
- Bearings and couplings

MRO and plant consumables

- Filters and strainers
- Safety and environmental supplies
- Lighting
- Discontinued and obsolete parts

HOW A REQUEST WORKS HERE

Send the requirement. The part number, the drawing or the nameplate, the material or standard the part has to meet, and the date the line needs it.

We search. Manufacturer first, then distributors and second sources. Where a sanitary part needs a certified material, we ask the maker for the certification before we quote.

Quote in writing. Pricing and lead time in one written quote, with the maker's material documentation where the maker provides it.

Deliver to the plant. Freight coordinated to the dock, tracked until it lands.
